

## How You Can Use Career Bytes with Your Students

Career Bytes videos are short (5-minute) video interviews of career professionals designed to communicate the essentials of technology-engaged careers. Working with kids on Career Bytes videos to discover what it takes to be an astronaut, business person, or a rock star is a project that can be fun and full of 21st century learning.

Nortel Learn iT interns film a video interview with Dr. Joyce Winterton, NASA Assistant Administrator for Education

This engaging project lets learners investigate and learn about a wide range of topics, all in one project, including:

- technology-related careers
- the world of work
- video production
- interviewing and researching techniques
- teamwork
- completing a project from beginning to end!

The ***Creating Career Bytes Toolkit*** has everything you'll need to get your budding professionals started. On the Nortel Learn iT web site at <http://nortellearnit.org/LearnIT/careerbyteslearning>, you'll find:

- web pages explaining the process (preproduction, production, and postproduction) and showing how Nortel Learn iT interns created Career Bytes for this Toolkit
- this downloadable step-by-step guide
- downloadable handout, checklists, and guidelines
- videos explaining why and how to make your own Career Bytes project
- links to Nortel Learn iT Career Bytes videos
